Timeline:

Week1~Week3: literature review and demo/template reading
Due: 14/03/2021
During this period should be able to finish gathering all useful literatures that can help in the future coding or report writing. By the Due date a possible reference list should be able to be presented.

Week4~Week8: code realizing & literature processing
Due: 16/04/2021
During these five weeks I will try to test the results and finish coding part. By the due date a complete edition of codes (maybe only except the improvement) should be able to handle. Besides, I still need to process the papers gathered from the first step and a complete draft of literature review part (except the description of dataset and how the articles can be useful for the project) should be presented before *22/03/2021*.
The initial presentation also lies in this session, and draft should be presented before next *25/03/2021.* The final version should be finished before *28/03/2021.*

Week9~Week14: making improvement, writing report and preparing for presentation
Due: 28/05/2021
The final process includes completing improvement, writing reports and prepare for the presentation. In fact, this session should be divided into two parts.
Improvement making:
Due: 30/04/2021
By the due date the improvements should be completed and a final edition of codes should be presented. In this session I am also supposed to start writing report based on the previous work.
Report writing & Presentation Preparing:
After finish coding, report writing part and final presentation preparing should be conducted. Slides for final presentation should be presented before *21/05/2021*, and report should be presented before *28/05/2021*.
